PROFESSIONALLY APPLIED APPEARANCE PROTECTION

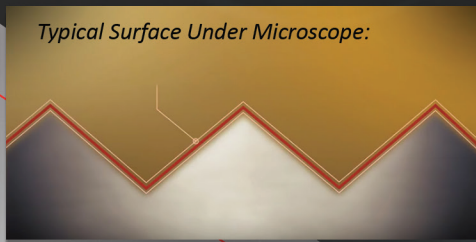

What is nan-o-tech-nol-o-gy?

It is the manipulation of matter on an atomic, molecular, and supramolecular scale (particles that fill every nook and cranny to create a smooth finish).

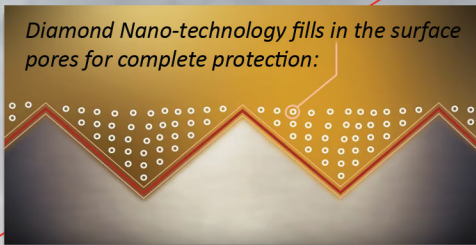

Typical Surface Under Microscope:

Contaminants become trapped in pores & damage surface:

Diamond Nano-technology fills in the surface pores for complete protection:

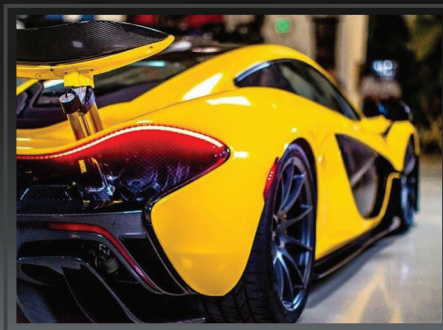

It's All About Technology

Vantage Protection Systems™

Products are backed by a **50+ Year Legacy** of Protective Excellence!

What Is It? Diamond Ceramic

Diamond Ceramic (patent pending) is the first ever long term protective coating to combine nano diamonds with ceramic technology. The nano diamonds give unparalleled shine and reflection, creating a diamond brilliance finish to your vehicle. The ceramic forms a chemical bond to the surface for outstanding protection. The two technologies together result in a stunning appearance with high levels of gloss, slickness, and reflection.

DID YOU KNOW?

Typical Wax melts off or dissipates at 120°-140°. VPS nano-technology protects your painted surface temperature to nearly 500°!

Why You Need It

- ◆ Fully insured 7-year warranty if damage occurs*
 - A. Including repainting
 - B. Replacement/repair of interior surfaces
 - C. Coverage for rips, tears, punctures, and burns
 - D. Renewable for life
- ◆ Preserve resale value - shield your new vehicle from both human and natural events.

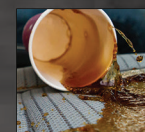

*coverage includes current plus 5 years old

What It Protects:

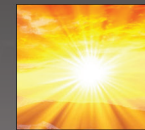

Interior Protection

Fabric, Carpeting, Leather & Vinyl Protection

- Fast Food & Beverage Stains
- Bleaches, Inks, & Dyes
